

Water is the basis of life. It's the most important thing you consume. That is why Nikken set out to develop a source of water that is as close to perfect as possible.

To meet this goal, the top experts in water science were consulted. Intensive research and the Nikken quest for more perfect water led to the development of the Nikken PiMag Optimizer II.

Used with your PiMag Water System or PiMag Aqua Pour™ Gravity Water System, the Optimizer II is designed to transform PiMag water through patented technology.

The Optimizer II ensures that your PiMag water is consistently good. It can modify the water pH (amount of acidity) and mineral content. It adds oxygen during the process.

Everyone wants water that tastes better. Water that is good for them. Water that they can drink every day, to replace the water that the human body requires to function.

The PiMag Optimizer II can help you meet all these needs. Your water will taste better. It can help you add plenty of water to your program for good health.

How does it work?

The Nikken PiMag Optimizer II features:

- Magnetic technology that was inspired by thunderstorms.
- Pi technology and oxygenation technology that works like a mountain stream.

Natural processes, to simulate the water found in nature.

THE NIKKEN PIMAG™ OPTIMIZER II WATER SYSTEM IS PART OF THE NIKKEN PIMAG™ WATER PRODUCT LINE. OTHER PIMAG PRODUCTS INCLUDE:

Nikken PiMag™ Water System — A countertop unit that provides a supply of filtered PiMag water on demand.

Nikken PiMag™ Aqua Pour™ Gravity Water System — The portable PiMag Water System, no plumbing or electricity necessary.

Nikken PiMag™ Ionic Filtration Water Bottle — For PiMag water wherever you go.

Nikken PiMag™ Shower System — Half of the substances in water that can be absorbed every day are in the shower. Make yours a PiMag shower.

Nikken PiMag™ Pi Concentrate — Pocket-size, lets you add pi to water or any beverage, anywhere.

Nikken Magna-Charger™ — Focus-Field Magnetic Technology for household plumbing.

CAUTION: If you use an electronic medical device such as a pacemaker, or have a magnetically sensitive surgical implant, avoid close proximity with this product. Women in the first trimester of pregnancy, or anyone who has a health problem should first consult a physician before using a magnetic product. Do not place in direct contact with magnetically sensitive items such as watches, audio/video tapes, credit cards, portable electronic equipment, etc.

Nikken PiMag water products are for use only with municipally treated water or other supply known to be safe for drinking.

For desired results with the PiMag Optimizer II, use only with PiMag water produced by the Nikken PiMag Water System or PiMag Aqua Pour.

NIKKEN®

Optimizer II

Optimized — ionized —
BALANCED — the Nikken solution
in the search for perfect water!

The PiMag™ Optimizer II puts water in balance.

A natural miracle — duplicated by Nikken

Near a small town in Japan is an area with unusual topographical features. A narrow stream flows between two hills. As it happens, one of these hills is largely composed of a mineral called magnetite.

The other hill contains calcium compounds. The stream between them courses over a bed of silicates, the material that forms natural crystal.

And here, Japanese scientists discovered that the water from this stream had amazing results on the surrounding plants.

What they saw astounded them. They named this substance pi water. Then they set out to duplicate these natural conditions in the laboratory. The result led to Nikken PiMag Water Technology.

Recreated in the laboratory

Researchers found that by using special materials, they could reproduce the environment that led to pi water in nature. Special ceramics were used to substitute for the effects of the mountains of minerals. A valuable sea coral is used that contains coral calcium, a unique calcium compound. These same materials form the pi component of Nikken PiMag Water technology.

This technology is the basis of all Nikken PiMag products.

The forces of the universe

Pure rainwater falls from clouds that contain a strong electrostatic charge — the source of lightning.

Rain passes through this highly charged field of energy.

- The Nikken PiMag Optimizer II features a pair of strong 4,400 gauss magnets, positioned with opposing polarity.
- A powerful electric motor causes the magnets to revolve, producing a complex, strong magnetic field.
- This creates a cocoon of magnetism similar to the effect in the Nikken Sleep System. But this is an active field of high energy.
- A rotor inside the pitcher — controlled by a 3,500 gauss magnet — passes the water through this magnetic field many times.

Pi ceramics

Inside the PiMag Optimizer II is a ring filled with pi ceramic material. Water flows through this pi ring while being optimized.

- Water is introduced to pi ceramics in the PiMag Water System or PiMag Aqua Pour. The Optimizer continues this process while the optimizing cycle is active.
- The pi element contains traces of calcium carbonate and other minerals that occur in environments such as subterranean water flows.
- In nature, these minerals provide control of water pH, reducing acidity.

Natural oxygenation

The rotor inside the Optimizer II pitcher agitates the water in a vortex (cyclone) pattern.

- This packs oxygen into the water while it is cycled through the magnetic field.
- Agitation adds oxygen to water without using chemicals.
- It works in the same way that water is oxygenated when flowing over the rocks in a natural environment.

This combination of oxygenating activity, pi minerals and magnetic field is designed to re-create the conditions in the stream where pi water — “the water of life” — was discovered more than 30 years ago.

Enhanced design in Optimizer II

The PiMag Optimizer II adds improvements to the original Optimizer design.

- A new, larger water pitcher gives the Optimizer II a full two-liter capacity. The pitcher's closeable spout makes it ideal for keeping optimized water that's ready for drinking.
- The ergonomic layout of the Optimizer II requires much less counter space, to fit easily even in a small area.
- The digital readout panel features an elapsed-time indicator that lets the user determine when to replace the pi ring, for best performance.

The steps to good water

1 Always start with water from the Nikken PiMag™ Water System or PiMag™ Aqua Pour.

- PiMag water is the breakthrough “water of life,” a Japanese discovery.
- The PiMag Water System or PiMag Aqua Pour provides an immediate source of PiMag water.
- Only these water products combine high-tech filtration and pi technology.
- Less expensive than ordinary bottled water!

PiMag water:
23-29¢ per gallon
Bottled water:
\$1-\$2 per gallon*

*Cost comparison includes price of PiMag Water System and replacement filters against the cost of bottled water over five years of use. Does not include cost of tap water, typically much less than 1¢ per gallon. Comparison based on average price of various bottled water products. These figures are estimates.

2 Process the PiMag water in the PiMag Optimizer II.

- Water from your local utility may not be consistent in quality or composition from day to day.
- Optimizing your PiMag water promotes consistency.
- Optimized PiMag water uses strong complex-field magnetics, pi and cyclone oxygenation to produce optimal water.

The PiMag Optimizer II features technology designed to adjust pH — add ions — and add pi. It's available only from Nikken. This extraordinary, patented technology is not found in any other product. Anywhere.

For more than 25 years, Nikken has been the world leader in wellness technology. The Nikken PiMag Optimizer II is the latest example of this leadership.
